	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Server holding game state and all checks including turn enforcement ● Two clients connect over sockets ● Simple text instructions or inputs ● Clients see own 10x10 board and 10x10 tracking board in terminal ● Complete win conditions	**Schedule - (For V2.0+)** ● Handle client disconnect mid-game ● AI as a third client for solo playing ● Visual icons for ships and color coded hits and misses ● Scoreboard ● Reset game after win instead of killing the server
Not Important	**Delegate - (Use a library)** ● Use Scanners for client input ● Use ArrayLists to store boards ● Use Server Socket and Socket to setup client server communication ● Use VSCode and JDK for clean terminal and coding environment	**Delete - (Cut it)** ● Detailed GUI similar to real battleship ● Leaderboards ● Different levels of AI's ● Sounds and animations ● Multiple simultaneous games ● Online multiplayer (not just in terminal on one device)
